Surgery Center

General Surgery Edition

REPUTATION AND HISTORY

Since 1892 when immigrant John Sklar first started the company in New York, we have maintained the same quality standards and commitment to service. He studied in Germany, and gained prominence in the global marketplace when he was awarded the principal contract as a surgical instrument provider to the U.S. military during the two world wars. Sklar's investment in research during the 1930s led to the development of a long lasting stainless steel alloy specifically for the manufacturing of surgical instruments. John Sklar's humanitarian pursuits led him to the Brooklyn Federation of Charities, the Beth Moses Hospital, and the Minsker Independent Benevolent Association.

Michael Malinowski
President

In the 21st century, Sklar's management team continues our founder's commitment to innovation with over 19,000 products in our current line. As a primary contract supplier to the Department of Defense and the DLA, Sklar is increasing its commitment to the military. Finally, building upon its moral responsibility, Sklar is a leader in charitable and humanitarian relief – via supply donations to local and international non-profit organizations.

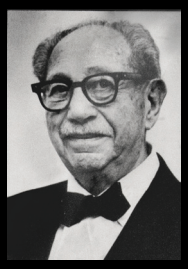

"We are so grateful to Sklar Instruments for providing our physicians with laparoscopic instruments to support their work in Malawi, training physicians at the teaching hospital in Lilongwe. Because of Sklar's donation, these physicians are now able to offer their patients a laparoscopic for procedures, which has never before been an option for patients in Malawi."

[Emma DelVecchio, Assistant Director of Development for the Office of Institutional Development, Thomas Jefferson University Hospital]

J.SKLAR Mfg.Co.Inc.

TERMS AND CONDITIONS

DISCLAIMERS:

Sklar offers a full line of quality surgical products and services to meet your needs.

Product information within this catalog is intended to provide general information about Sklar, its products and services and makes no representation either expressed or implied to the contrary. It is not meant to provide specialist advice or instructions concerning the products available from Sklar. For additional information and special inquiries concerning our products and services, please contact Sklar directly.

In an effort to continually improve our product line, Sklar reserves the right to change patterns without notice. Contact your sales representative to verify availability.

In no event is Sklar liable for any incidental, special or exemplary damages or loss of profits in connection with the use of a Sklar Instrument or Product.

Convenience Kits (FDA recognized term) illustrated in this catalog are representative of Sklar's assembly capability. The final design and approval of the kit is the responsibility of the customer and will be managed in accordance with the Sklar Design and Development process.

Sklar Corporation
889 S. Matlack Street

ORDERS

- Sklar's full line of Instrument Products are available through any authorized Sklar Distributor. Contact our Customer Service Department at 800.221.2166 to locate a Sales Representative in your area.
- Customers with established accounts and in good standing are subject to Net 30 days from date of invoice. Poor credit conditions can result in denial, delay or cancellation of orders.

SHIPMENTS

- Pricing is FOB West Chester PA unless otherwise noted and may be subject to change. Shipping schedules are approximate and subject to change without notice. Same day shipping is available. Standard orders will be shipped via the carrier of Sklar's choice. Special shipping requests will be accepted but additional handling charges are applicable.
- All Sklar instruments and product are carefully inspected prior to shipment. Customers shall inspect all items upon receipt and file a claim within (10) days of receipt of shipment.

WARRANTY

- Instruments and Products are recommended for their intended use only, and require continuous and proper care. Misuse can damage instruments and products and void the warranty.
- All Sklar instruments are guaranteed to be free from defect in material and workmanship. Defective instruments may be returned for repair or replacement at no charge. Repair or replacement is at the discretion of Sklar. Warranty is void on any instrument serviced by any company other than Sklar Instrument Repair Services.
- Sklar offers a variety of supplementary surgical products. These products are held to high standards for material and craftsmanship and some are subject to a limited warranty (vary by product).

RETURNS

- Unused instruments returned in the original packaging will be accepted within 30 days of purchase. Standard sterile kits may be returned within 30 days provided sterility of the inner packs have not been compromised, package is unopened and resalable. Most cleaning products are non-returnable.
- Product that was special (engraved/etched) or custom ordered, discontinued, marked or altered in any way, including product or package labeling, will not be accepted for return or credit.
- A Returned Goods Authorization (RGA) number must be obtained prior to returning products. Contact Customer Service at 800.221.2166 for authorization. Credit, repair and/or replacement are at Sklar's discretion. See www.sklarcorp.com for complete return policy and procedures.

CARE AND CLEANING

Sklar

Sklar is pleased to offer a full line of Care & Cleaning agents to disinfect, decontaminate, sterilize, lubricate and protect your stainless steel surgical instruments and equipment. For expert care of your surgical instruments at every stage of the cleaning process, trust Sklar to deliver the right cleaning agent for you.

3 EASY STEPS FOR THE CARE AND CLEANING OF YOUR INSTRUMENTS

1 DECONTAMINATION

2 MINUTE KILL TIME

Sklar Soak™ and Sklar Disinfectant are intended to safely decontaminate soiled surgical instruments immediately after use. These ready to use, non-toxic formulas are safe for use on medical and surgical equipment including stainless steel, chrome, glass, plastic, Plexiglas, baked on painted and other non-porous surfaces. Effective against H1N1, HIV-1, HSV, VRE, Rotaviruses, Hep B & C as well as TB, MRSA and A-Baumannii.

2 CLEANING

DETERGENTS AND ENZYMATICS

Choose from a wide selection of Sklar cleaning agents. First use Sklar Spray-Zyme™ foam pre-cleaner to coat instruments until ready to process. Next use Sklar Enzymatic™, a fast acting detergent specifically formulated for soaking/cleaning instruments heavily laden with organic debris. Finally, use Sklar Kleen™ as your neutral pH, non-corrosive detergent for manual, ultrasonic or automatic cleaning. Sklar detergents and enzymatics are effective in the cleaning process of surgical instruments, as well as metals, glassware, plastics and rubber.

3 LUBRICATION

SKLAR LUBRICANT

To guarantee the extended life and performance of your surgical instruments, lubrication should be a standard part of your instrument processing regimen. Easy to use Sklar Instru-Guard™ products improve function and contain rust inhibitors that protect against corrosion, rust and stains. Following lubrication, instruments should be sterilized according to the instrument manufacturer's instructions and/or stored until use.

CARE AND CLEANING

Sklar

SKLAR-CIDE™

HIGH LEVEL DISINFECTING/STERILIZING SOLUTION

Sporicidal • Bactericidal • Virucidal• Fungicidal

SKLAR-CIDE provides a safe and efficient means for the high-level disinfection or sterilization of medical, ophthalmic, dental and surgical devices including endoscopes and lensed instruments. It may be used as a standard soak solution or in automatic reprocessing units set at room temperature. Unlike other solutions, there is no need to increase the solution temperature to provide high-level disinfection in 25 minutes.

SKLAR-CIDE is a surfactant-free, activated glutaraldehyde liquid chemical sterilant and high-level disinfectant. Its active ingredient is glutaraldehyde in a nominal concentration of 3%. When the powdered activator is added, the solution turns green in color to indicate its readiness for use. In addition to the active ingredient, this ready-to-use solution contains buffers, wetting agents, and a rust and corrosion inhibitor and it has a pleasant fragrance.

SKLAR-CIDE produces high-level disinfection at room temperature in as little time as 25 minutes, and complete sterilization in 10 hours at room temperature.

- Reusable for 28 days instead of 14, safer and saves time and money.
- Surfactant free - Will not damage scope surfaces or cloud lenses.
- Can be used safely on all devices, including instruments and endoscopes. No need to stock several products.

Sklar

SKLAR SOAK™

INSTRUMENT PRE-SOAK & DECONTAMINANT

RUST RESISTANT!

Immersing soiled instruments in SKLAR SOAK effectively pre-cleans and decontaminates, without fear of rusting!

SKLAR SOAK is an effective pre-cleaner that breaks down bio-burden, lifting blood and other organic debris from the surface, while penetrating box locks and crevices. The rust inhibitor protects the delicate chromium oxide layer of the instrument, thus defending against rust and corrosion. Using SKLAR SOAK as a pre-cleaner is the first line of defense against rust, prolonging the life of the instrument and therefore protecting your investment!

Soaking for only two minutes thoroughly decontaminates instruments, reducing the risk of exposure to pathogens such as H1N1, HIV-1, HSV, VRE, Rotaviruses, Hep B & C as well as TB, MRSA and A. Baumannii. However, because SKLAR SOAK contains a rust inhibitor, instruments may soak for several hours without fear of rusting! Employees are protected from cross contamination, and at the same time can enjoy the freedom to reprocess instruments when it's convenient!

SKLAR SOAK is ideal for use on all stainless steel instruments:

- PH balanced, designed specifically for stainless steel instruments.
- Intermediate level disinfectant with broad spectrum of efficacy.
- Rust resistant.
- Non-caustic.
- Ready to use.
- No special handling or disposal.
- Fragrant, no offensive odors.
- Non-glutaraldehyde.

SKLAR DISINFECTANT™

2 MINUTE KILL TIME

READY-TO-USE SPRAY SURFACE DISINFECTANT

- Ready to use, non-toxic formula.
- Specially formulated for the control of cross contamination.
- Effective against a broad range of pathogens including H1N1, HIV-1, HSV, VRE, Rotaviruses, Hep B & C as well as TB, MRSA and A. Baumannii.
- Safe for all areas of the facility including the NICU, operating rooms, isolation rooms, patient care areas and laboratories.
- Satisfies OSHA's Bloodborne Pathogen Standards.
- Non-irritating formula.
- EPA registered.

10–1617	100 Towelettes / Canister	12/case

CARE AND CLEANING

SKLAR SPRAY-ZYME™

SURGICAL INSTRUMENT PRE-CLEANER

Multi-Enzyme Based Foam Spray Instrument Cleaner

Processing soiled instruments immediately after use is key to preventing damage caused by dried organic fluids. If rinsing is not immediately available, it is best to pre-treat instruments with a neutral pH/enzymatic solution at point of service. Sklar SPRAY-ZYME is a multi-enzymatic spray that creates a long lasting, heavy foam, coating soiled instruments and scopes for hours after application. Encrustation is avoided and instruments are pre-cleaned and remain moist until ready for processing.

- Enzyme foam stops blood and bodily fluids from drying on surgical instruments.
- Foam consistency prevents messy spills during transportation.
- Neutral pH formula is safe for use on stainless steel, tungsten carbide, aluminum and brass instruments.
- Microbiological control agents inhibit bacterial growth.
- Ready-to-use formula is cost effective and saves time.

PRODUCT NUMBER	FEATURES	QUANTITIES
10–2722	22 oz. Refillable Spray Bottles	12/case
10–2724	1 Gallon Bottles	4/case

Sklar

SKLAR ENZYMATIC™ DETERGENT

MULTI-ENZYME DETERGENT CONCENTRATE

100% Biodegradable

SKLAR ENZYMATIC Detergent is a low-foaming, fast acting detergent specifically designed for use when instruments and/or cloth materials become soiled with organic debris.

SKLAR ENZYMATIC Detergent may be used as a manual instrument cleaner as well as a pre-soak for blood-contaminated linens, clothing and instruments. It is also used in ultrasonic units and in washer/sterilizer/decontaminators. When used as directed, the enzymatic pH neutral formula is safe for use on rubber, plastic, stainless steel instruments, and surgical equipment as well as cloth.

PRODUCT NUMBER	FEATURES	QUANTITIES
10–2777	1 Gallon Bottles	4/case
10–2775	1 Gallon Bottles	2/case
10–2776	1 Gallon Bottle	1 bottle

CARE AND CLEANING

SKLAR KLEEN™

LIQUID DETERGENT

Regular Formula for Manual and Ultrasonic Cleaning

The SKLAR KLEEN Liquid Detergent was specifically developed for manual and ultrasonic cleaning. It is an effective yet non-corrosive, non-aggressive, phosphate-free and biodegradable formula that will not etch glassware or attack instrument metals. It is moderately alkaline, affording optimum cleaning power. Appropriate for stainless steel, metal, glassware, plastics and rubber.

Low Foam Formula for Automatic Cleaning

The SKLAR KLEEN Low Foam Liquid is concentrated in order to provide a very cost-effective cleaning solution. It is especially formulated to maintain low foam, ensuring effective and trouble-free action in washer/sterilizers and tunnel washers. Dispersing quickly, the SKLAR KLEEN Low Foam formula is also well suited for automatic injection systems.

PRODUCT NUMBER	FEATURES	QUANTITIES

10-2702	Low Foam 1 Gallon Bottle	1 bottle

Sklar

SKLAR KLEEN™

POWDERED DETERGENT

The SKLAR KLEEN Powdered Detergent is an excellent way to reduce or neutralize the effects of corrosive minerals that are inherent in virtually all community water supplies. SKLAR KLEEN Powdered Detergent is ideal for manual and ultrasonic cleaning. One economical 3½ lb. container can make in excess of 150 gallons of cleaning solution. It's non-corrosive, non aggressive, phosphate free formula will not etch glassware or attack your instrument metals.

- Economical and Convenient.
- For all manual and ultrasonic cleaning.
- Appropriate for stainless steel, metal glassware, plastics and rubber.
- Non-Corrosive.
- Easy to Handle.

PRODUCT NUMBER	FEATURES	QUANTITIES
10–1608	Powdered 5 lb. Containers	4/case

CARE AND CLEANING

SKLAR INSTRU-GUARD™ ONE STEP

A "ONE STEP" INSTRUMENT CLEANER AND LUBRICANT

EXTENDS INSTRUMENT LIFE!

SKLAR INSTRU-GUARD ONE STEP contains a penetrating lubricant that protects and helps extend the life of surgical instruments. The detergents and emulsifiers quickly break up and remove organic soils from box locks and other hard to reach places.

SKLAR INSTRU-GUARD ONE STEP contains four rust inhibitors to control corrosion and eliminate scaling and spotting. It does not contain phosphates and can reduce the time and cost involved in processing your instruments by cleaning and lubricating in one easy step.

PRODUCT NUMBER	FEATURES	QUANTITIES
10–2800	1 Gallon Bottles	4/case
10–2801	1 Gallon Bottle	1 bottle

Sklar

SKLAR INSTRU-GUARD™ LUBE

SURGICAL INSTRUMENT LUBRICANT / RUST INHIBITOR

- Extend the Life of Instruments.
- Protects all Surgical Instruments.

SKLAR INSTRU-GUARD LUBE is an easy-to-use, water soluble, lubricant and rust inhibitor. When used daily as a rinse after every cleaning it keeps moving parts operating smoothly and remains effective after autoclaving, but without leaving an oily residue.

Regular lubrication is essential no matter which cleaning method is employed (including ultrasonic). SKLAR INSTRU-GUARD LUBE is ideal for maintaining instrument quality and performance.

PRODUCT NUMBER	FEATURES	QUANTITIES

CARE AND CLEANING

SKLAR POLISH™

INSTRUMENT STAIN REMOVER

SKLAR POLISH is an effective stain remover for use on all your metal surgical instruments, including stainless steel, chrome and brass. It will brighten instrument trays, basins and racks and may also be used on porcelain and tile surfaces.

- Non Abrasive.
- Removes corrosive stains.
- Extends instruments life.
- "Like New" results.

Sklar

SKLAR-SHEEN™

AUTOCLAVE AND INSTRUMENT CLEANER AND CONDITIONER

With an efficacious phosphoric acid cleaning agent, SKLAR SHEEN is a robust spot, stain and rust remover. Ideal for dissolving hard water deposits, use in autoclaves to quickly cut through steam sterilizer scale and deposits.

Versatile and effective, SKLAR SHEEN combines powerful stain and rust removers with corrosion inhibitors, making it tough on stains but gentle on instruments. Recondition instruments to restore them to nearly brand new working condition.

Use to clean and recondition any stainless steel surface to its orginal luster, including carts, trays and basins.

- Conditions for lasting protection.
- Dissolves hard water deposits.
- Frees up frozen box locks.
- Restores and extends surgical instrument life.

	Stainless Steel Bristle Cleaning Brush	1 each
	Nylon Bristle Cleaning Brush	1 each

TROUBLE SHOOTING

NO STEEL IS TRULY "STAINLESS"

It's a fact that so-called stainless steel is subject to both water-spotting and staining. However what many people identify as a "rust" problem usually turns out to be something else.

Most often the problem is actually a stain caused by a surface deposit. These deposits appear in a variety of colors depending upon the type of deposit involved. Once the cause is found and eliminated, most of the time the problem quickly diminishes or disappears completely.

As you probably know, stainless steel is ideally suited for the surgical suite because it is rust resistant, it can be honed to an extremely sharp edge or fine point, and it can be hardened to maintain the delicate, yet precise, requirements of the surgeon. But it is this hardenable quality – the amount of carbon used during the manufacturing process – coupled with harsh chemicals and improper care that renders stainless steel susceptible to corrosion.

To protect your instrument investment, Sklar cleaning agents have been specifically formulated to provide cost effective instrument care solutions that help maintain the life and performance of your valuable stainless steel instruments.

Sklar

TROUBLE SHOOTING

CORROSION

Problem: Debris and residue in box locks, serrations and ratchets.

Solution: Serrations, box locks and ratchets should be carefully cleaned and rinsed. A soft bristle brush is effective in these difficult areas.

Problem: Moisture remaining on the instruments within the sterile wrapped packs; excessive moisture in autoclave during sterilization and termination of cycle.

Solution: Preheat autoclave, drying time cannot be accelerated, open autoclave door slightly. Routinely inspect valves. Malfunctioning valves can precipitate corrosion.

Problem: Some local water supplies contain excessive quantities of alkali. This can manifest itself by depositing corrosive matter on the instruments.

Solution: It is generally accepted that cold distilled or demineralized water be used during sterilization. An alternative is to use the local water supply, while instituting a program of preventive maintenance. Carefully clean surfaces with SKLAR KLEEN™, using SKLAR POLISH™ to remove difficult stains and SKLAR LUBE™ for proper lubrication.

PITTING

Problem: Instruments are inevitably exposed to chemical compounds that initiate pitting. The most common are saline solutions and blood.

Solution: It is essential that instruments be rinsed with distilled or demineralized water and then cleaned routinely.

Problem: Some Non-Sklar detergents contain a chloride or have an acid base. If rinsing is not thorough, the residual detergent can precipitate pitting. Hydrochloric acid can be formed by the combination of chloride in the cleaner and steam, causing the instrument to pit.

Solution: Evaluate detergents without a chloride base. SKLAR KLEEN™ is recommended.

Problem: Instruments may be pitted when the detergent used has an excessively high pH. If instruments are not rinsed thoroughly and then autoclaved, the heat increases the effect of the solution on the instruments.

Solution: Use only detergents specifically developed for instrument cleaning. SKLAR KLEEN™ products are pH balanced.

BROWNISH STAIN

Problem: This stain is more obvious on dull finish instruments. Most likely, it is a deposit of chromium oxide. The thin hard layer protects stainless steel from corrosion precipitated by the atmosphere. The brownish film (sometimes dull blue) occurs naturally when stainless is heated. Occasionally this stain can be traced to the sterilizer. Improper cleaning compounds could contain poly phosphates that cause the copper components in the sterilizer to be deposited by electrolytic action on the stainless steel instruments.

Solution: Water supply to autoclave should be cold and demineralized. Use the correct amount of SKLAR KLEEN™ as recommended for best results.

BLUISH GRAY STAINS

Problem: Cold sterilizing solutions.

Solution: In the preparation of the solution make certain the manufacturer's directions are followed accurately. To minimize discoloration use distilled water and add a rust inhibitor. Using the solution beyond recomended time limitations will cause the solution to become corrosive.

RUST DEPOSIT

Problem: Sterilizing instruments of different metals in the same cycle will cause rusting. An electrolytic action carries the carbon particles from the exposed metal and deposits them on the stainless steel instruments. The rapid oxidation of molecules results in a surface film of rust.

Solution: The ideal technique would be to sterilize the two types of instruments separately. It is recommended that chrome plated instruments that indicate signs of peeling or flaking be replaced with stainless steel instruments.

Problem: The rust film on the surface of stainless steel instruments can be caused by chemicals in the detergent. Excess amounts of iron or other minerals from the local water supply may cause the rust deposits.

Solution: It is recommended that instruments be rinsed with distilled or demineralized water. Surface rust can be removed by light buffing or an application of SKLAR POLISH™.

LIGHT AND DARK COLORED SPOTS

Problem: Spotting caused by slow evaporation of water drops identified with the mineral content of the water.

Solution: Eliminate water droplets by adhering to autoclave manufacturer's operating instructions. Autoclave door should not be opened until steam has been completely vented.

PREMIUM

Sklar

Sklar is proud to offer a full line of Premium instruments that have been customized to meet the needs of clinicians for specific procedures. Choose from a wide variety of the most popular patterns within each premium line.

Tungsten Carbide

Tungsten carbide is an extremely hard alloy that provides an exceptionally strong and positive holding power beyond that of any standard instrument. Sklar TC instruments improve control and reduce trauma. Using the special non-slip tissue gripping profile, users can apply exact pressure for proper tissue handling and suture tying. These precision ground instruments are readily indentified by the gold handles.

Sklar Edge™ Tungsten Carbide

Sklar Edge scissors are manufactured using a Sklar exclusive edging process that permanently bonds Tungsten Carbide to the scissor blades, resulting in a stronger, sharper edge. These perfectly balanced scissors are readily identified by the dual gold finger rings and maintain a 5-year guarantee on durability.

Sklar Edge™ Tungsten Carbide Supercut SklarHone™

Sklar Edge™ Tungsten Carbide Supercut SklarHone™ Scissors combine all the advantages of durable Tungsten Carbide with the precision performance of Supercut SklarHone™ blades. Easily identify these instruments with one gold handle and one black handle.

Supercut SklarHone™

Designed to cut through tissue effortlessly, SklarHone™ Scissors feature the razor-like edge of a surgical knife on the upper blade. The opposing blade is available as Supercut, with micro-serrations to hold tissue and prevent slippage, or as a standard, smooth edge. Both patterns are ideal for delicate surgeries and specially crafted to cut cleanly without catching or leaving minute tags. SklarHone™ scissors are distinctly identified by their dual black handles.

SklarCut™

Sklarcut™ improves the design and function of your most frequently used surgical instruments with the addition of ultra-fine serrations on one blade. This premium feature provides additional surgical control by holding the tissue while cutting more cleanly and with greater precision. SklarCut™ scissors are easily identified by the gold finger ring on the serrated blade handle.

SklarLite™ / SklarLite XD™

Sklarlite™ premium scissors provide the clinician a lighter pattern, minimizing fatigue during prolonged procedures. A comfortable instrument that withstands the rigors of frequent use while retaining its structural integrity. Sklarlite XD™ extra delicate scissors provide the most sensitive surgical tool as well as our lightest pattern with surprising strength. Sklarlite™ and Sklarlite XD™ are fully guaranteed for a lifetime of dependable use.

Sklar LiteGrip™

Sklar LiteGrip™ instruments offer fenestrated handles to allow for a firm secure grip in a lighter pattern and are ideal for extended procedures.

Z-TYPE SCISSORS

Sklar's Z-Type Hysterectomy/Parametrium Scissors are specifically designed to ideally meet the surgeon's needs during abdominal procedures. Manufactured from German grade stainless steel and under the highest quality standards, these specialized instruments provide uncompromised balance, feel and performance. With solid Tungsten Carbide inserts, Z-Type Scissors have extremely sharp, strong and precise cutting edges with lasting durability, and are specifically formed to cut tissue laterally.

PRODUCT NUMBER		DESCRIPTION	
16–4000	9"	Z-Type Parametrium Scissors	Slight Curve
16–4001	9"	Z-Type Parametrium Scissors	Curved
16–4002	9"	Z-Type Parametrium Scissors	Full Curve

Sklar's Left-Handed Needle Holders

Now there's a ring-handled needle holder created for the needs of left-handed surgeons.

Sklar's left-handed needle holder features a unique ratchet design that makes it possible for surgeons to easily control the needle holder with their left hand. As a result surgeons experience less fatigue and hand strain than ever before.

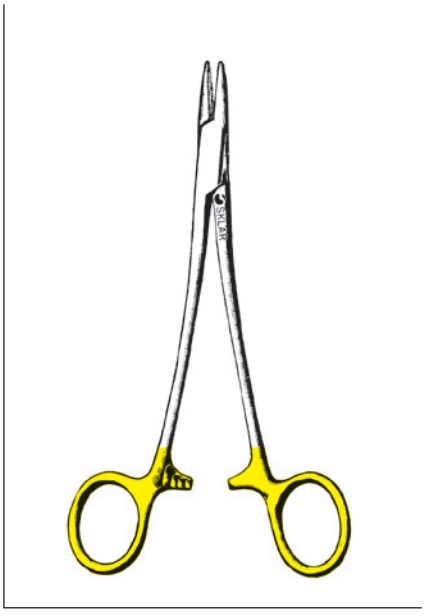

Suitable for left hand use.

SKLARLITE
THE LIGHT TOUCH

SKLARLITE™ OFFERS THE SURGEON EXQUISITE CONTROL

We recognize the need for scissors that maintain the strength and durability of a standard instrument but afford a lighter pattern. In response to industry demands for these lighter instruments, Sklar established the SklarLite line of premium operating room scissors.

Through a unique manufacturing technique, we are able to yield a noticeably lighter instrument that maintains the structural integrity of the original instrument. These extremely sensitive scissors give the surgeon maximum control and precision while comfortably withstanding the daily rigors of frequent use.

Sklarlite™ Scissors are ideal for prolonged procedures, minimizing fatigue and providing exquisite control. These surprisingly strong instruments carry the same day-in and day-out reliability that you have come to expect from all Sklar instruments and are fully guaranteed for a lifetime of dependable use.

SKLARLITE XD
EXTRA DELICATE

SKLARLITE XD™ DELIVERS THE ULTIMATE IN PRECISION

Sklar has surpassed industry standards by offering an extra delicate pattern operating room scissor, giving the surgeon one of the lightest general surgery scissors on the market today.

Through a unique manufacturing technique, we are able to produce our lightest pattern scissor, furnishing strength and integrity equal to that of the original instrument. These extra delicate scissors are our most sensitive surgical tool and allow the surgeon the ultimate in precision and control.

Sklarlite XD™ Scissors are ideal for prolonged procedures, comfortably withstanding the daily rigors of frequent use. They carry the same day-in and day-out reliability that you have come to expect from all Sklar instruments and are guaranteed for a lifetime of dependable use.

For the surgeon who demands the finest in OR scissors, SklarLite XD is the ultimate choice.

SKLAR PRECISION
COMBINATION IRIS AND SUTURE SCISSORS

Similar to the very popular Iris Scissors, these specially designed scissors are ideal for use in extremely delicate surgery. The delicate blades are honed extremely fine and sharp. The upper blade has a fine serration to maintain grip and the lower blade is razor honed to give a smooth precision cut on tissue or suture. There is also a suture cutting notch near the tip of the blade for convenience during procedures.

SKLARCUT™

SKLARCUT™
SERRATED BLADE

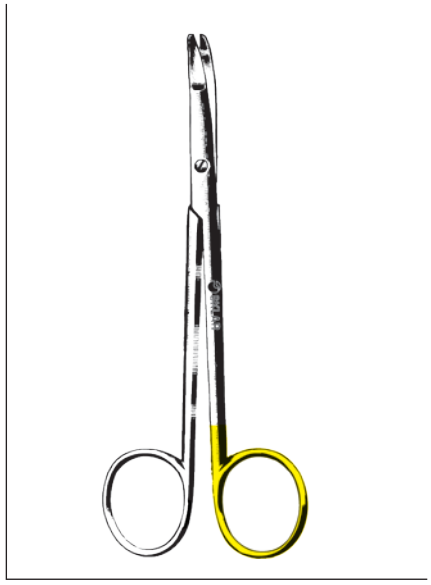

SKLARCUT™ GOLD-RING SCISSORS CUT CLEANLY AND PRECISELY

Surgical scissors are your most frequently used instrument. SKLARCUT scissors improve the traditional design with ultra-fine serrations on one blade.

This special feature provides for smooth and less traumatic cutting of fine and coarse tissue. One blade of these extremely high tempered scissors is precision ground, while the other blade employs extremely fine serrations that help the scissors maintain grip and accuracy throughout the entire cut.

SKLARCUT scissors provide users with an exceptionally sensitive "feel" and help eliminate problems associated with tissue slippage during cutting.

For easy visual distinction from normal scissors, the finger ring of the serrated blade is gold-coated.

TUNGSTEN CARBIDE

Sklar

SKLAR EDGE™
TUNGSTEN CARBIDE

SKLAR EDGE™ TUNGSTEN CARBIDE SCISSORS GIVE YOU THE EDGE IN PERFORMANCE

Tungsten carbide is one of the hardest alloys made. And it is tungsten carbide that gives SKLAR EDGE surgical scissors an exceptionally sharp and durable cutting edge – an edge that rarely needs sharpening.

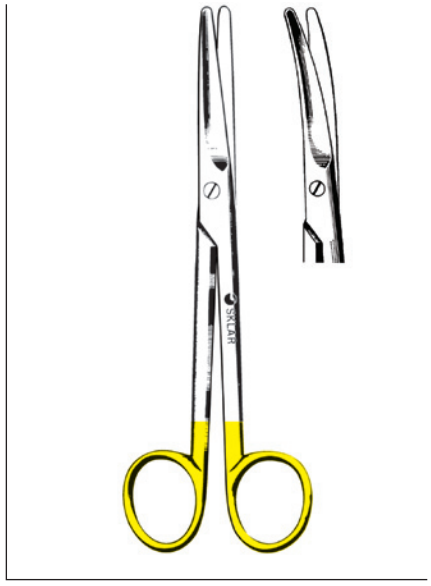

SKLAR EDGE scissors are specially made to perform better and stay sharper for a significantly longer period of time when compared to non-TC scissors. The unique edging process permanently bonds the tungsten carbide to your scissors giving you smooth and controlled performance, a perfectly balanced "feel" of enhanced precision and an edge guaranteed to stay sharp for five full years.

All SKLAR EDGE scissors come with gold plated finger rings for easy identification.

SKLARHONE™

SKLARHONE™ FOR KNIFE EDGE SHARPNESS WITH SCISSORS PRECISION

With the addition of SKLARHONE premium operating room scissors, Sklar continues its effort to provide the surgeon with the most current technology and the largest selection of superior instruments. SKLARHONE scissors combine the razor sharp cutting edge of a knife, with the control and precision of scissors, in one instrument. One blade on the SKLARHONE scissors is crafted with the cutting geometry of a knife, while the opposing blade has a standard smooth, scissors edge for clean cutting action. When cutting thick tissue, SKLARCUT SKLARHONE scissors combine a serrated lower blade to hold tissue with, a knive-like upper blade, leaving the edges smooth and clean. For easy visual distinction from the normal scissors, these scissors come with dual black handles and shafts.

Sklarlite™ Forceps
Provide Lightness And Durability

SKLARLITE
THE LIGHT TOUCH

To meet industry demands for lighter pattern instruments, Sklar developed the SklarLite line of premium operating room forceps. Through a unique manufacturing technique, we are able to deliver a noticeably lighter instrument that maintains the strength and durability of a standard instrument. These extremely sensitive forceps give the surgeon maximum control and precision while comfortably withstanding the daily rigors of prolonged surgery. Sklarlite Forceps minimize fatigue and provide the exquisite control and reliability you have come to expect from all Sklar instruments. Sklarlite Forceps are covered under the same warranty that guarantees all Sklar instruments for a lifetime of dependable use.

Sklarlite XD™
Delivers The Ultimate In Precision

SKLARLITE XD
EXTRA ▾ DELICATE

Sklar has surpassed industry standards by developing extra delicate operating room forceps that offer the surgeon one of the lightest general surgery instruments on the market today. Through a unique manufacturing technique, we are able to produce the lightest pattern forceps, affording strength and integrity equal to that of the original instrument. These extra delicate forceps are our most sensitive surgical tool, giving the surgeon the ultimate in precision and control.

Sklarlite XD Forceps are ideal for prolonged procedures, comfortably withstanding the daily rigors of frequent use. They carry the same day-in and day-out reliability that you have come to expect from all Sklar instruments and are guaranteed for a lifetime of dependable use. For the surgeon who demands the finest in OR forceps, SklarLite XD is the best choice.

Sklarlite™ Forceps
Provide Lightness And Durability

To meet industry demands for lighter pattern instruments, Sklar developed the SklarLite line of premium operating room forceps. Through a unique manufacturing technique, we are able to deliver a noticeably lighter instrument that maintains the strength and durability of a standard instrument. These extremely sensitive forceps give the surgeon maximum control and precision while comfortably withstanding the daily rigors of prolonged surgery. Sklarlite Forceps minimize fatigue and provide the exquisite control and reliability you have come to expect from all Sklar instruments. Sklarlite Forceps are covered under the same warranty that guarantees all Sklar instruments for a lifetime of dependable use.

Sklarlite XD™

Delivers The Ultimate In Precision

Sklar has surpassed industry standards by developing extra delicate operating room forceps that offer the surgeon one of the lightest general surgery instruments on the market today. Through a unique manufacturing technique, we are able to produce the lightest pattern forceps, affording strength and integrity equal to that of the original instrument. These extra delicate forceps are our most sensitive surgical tool, giving the surgeon the ultimate in precision and control.

Sklarlite XD Forceps are ideal for prolonged procedures, comfortably withstanding the daily rigors of frequent use. They carry the same day-in and day-out reliability that you have come to expect from all Sklar instruments and are guaranteed for a lifetime of dependable use. For the surgeon who demands the finest in OR forceps, SklarLite XD is the best choice.

Sklar TC Insert Forceps

Grip Vessels, Tissues And Sutures Firmly Yet Gently

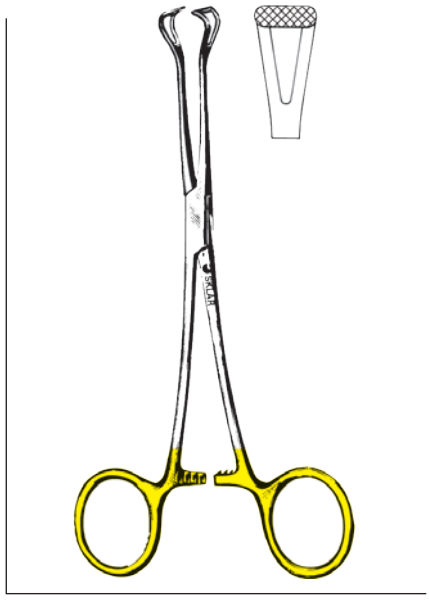

SKLAR TC INSERT forceps are designed to provide long-lasting, positive holding power. SKLAR TC INSERT forceps utilize a special non-slip tissue gripping profile, which enables the user to apply exactly the amount of pressure needed for proper tissue handling and suture tying with reduced trauma.

SKLAR TC INSERT forceps with durable tungsten-carbide inlays, exceptionally fine milled serrations, easy-find gold-plated handles, and a full 5-year performance guarantee make SKLAR TC INSERT forceps the surgeon's choice.

NEEDLE HOLDERS

TUNGSTEN CARBIDE

Sklar

Sklar TC™ Needle Holders

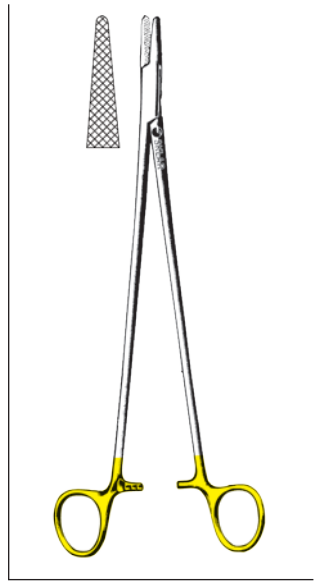

Are Unconditionally Guaranteed for Five Years

SKLAR TC needle holders are designed to hold suture needles far more securely and firmly than standard needle holders. They utilize solid tungsten-carbide inserts for the longest life possible. All inserts have a precisely ground, virtually indestructible, pyramid profile that is harder than the needles they hold. The pyramid profile retains its original shape much longer than other needle holders. This profile ensures firm needle holding capability and virtually eliminates needle rotation.

SKLAR TC needle holders feature graduated ratchet grips for safe, secure and exacting control over needle holding pressure, and gold plated rings for quick identification.

5 Year Warranty

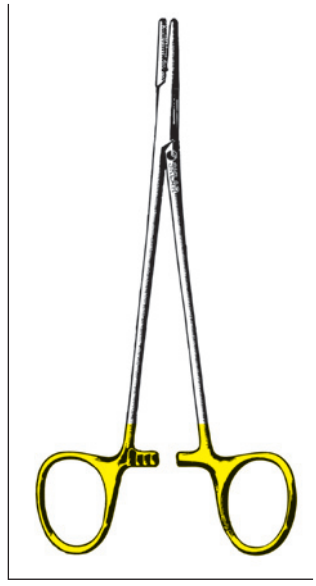

SKLAR TC needle holder jaws with tungsten carbide inserts are warranted for five full years of normal use. During this warranty period, if any adjustments become necessary, SKLAR will repair or replace the SKLAR TC needle holders. A nominal charge will be made for repairs once the warranty period has expired. The non- TC portion of the instrument is guaranteed under Sklar's Lifetime Warranty.

LEFT HAND

Sklar

Sklar's Left-Handed Needle Holders

Now there's a ring-handled needle holder created for the needs of left-handed surgeons.

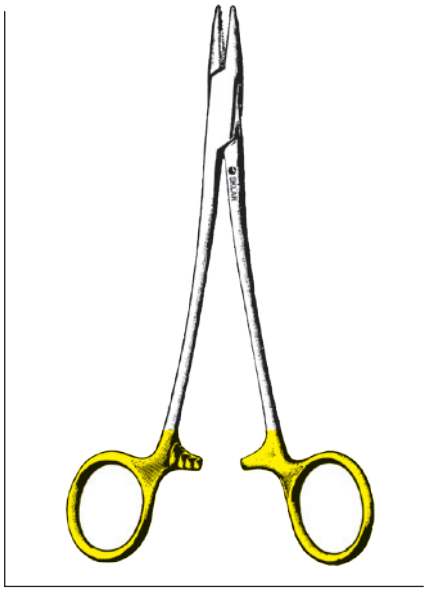

Sklar's left-handed needle holder's features a unique ratchet design that makes it possible for surgeons to easily control the needle holder with their left hand. As a result surgeons experience less fatigue and hand strain than ever before.

Suitable for left hand use.

NEEDLES

Sklar Surgical Needles are offered in multiple configurations. For wound and laceration care, the Reverse Cutting Needles are made with a sharp outer edge to allow for smooth and atraumatic penetration of tough skin and fascia. Tapered needles are used almost exclusively on soft, less dense tissue and when the smallest diameter hole is desired. All needles have Regular Surgeon Eyes unless otherwise specified.

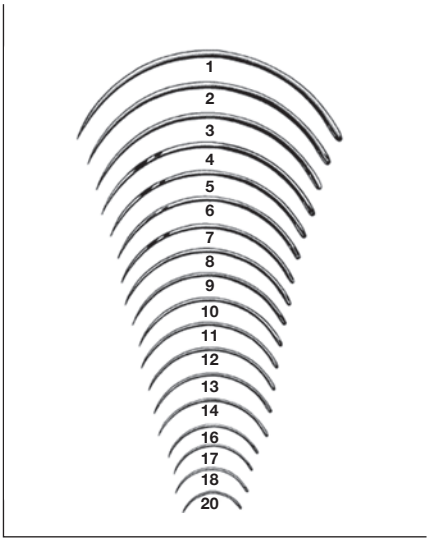

All needles are sold Non-Sterile in packages of 12. When ordering simply add the corresponding needle size number to the end of the needle family product number, ie. needle size #4 would be 93-1760-4 or size #16 would be 93-1760-16. Needles are not shown to actual size.

SKLAR SOAK™

SURGICAL INSTRUMENT SOAK

Immersing soiled instruments in SKLAR SOAK™ for two minutes substantially reduces the risk of exposure to many infectious organisms.

- Effective Against: H1N1, HIV-1, HSV, VRE, Rotaviruses, Hep B & C as well as TB, MRSA, A. Baumannii.
- Non-Glutaraldehyde.
- PH Neutral Formula designed for safe use on all surgical instruments & stainless steelware.
- Non-Caustic Formula allows for use as a manual cleaner or in ultrasonic units.
- EPA Registered.
- Meets all OSHA standards on blood borne pathogen destruction.
- Ready to use.

ARTHROSCOPY
GENERAL

Sklar

SKLAR ARTHROSCOPY INSTRUMENTS

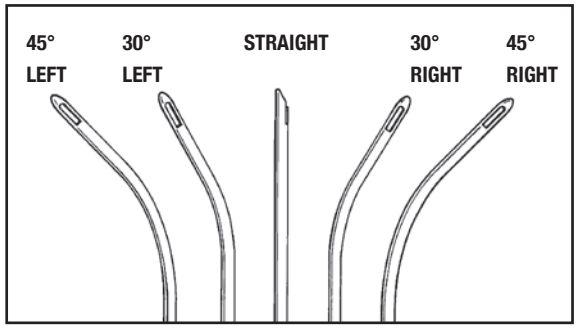

Sklar is proud to present its line of arthroscopy instruments, featuring dual safety pins and an innovative spring system that prevents tip breakage even during the most intricate procedures.

The knurled screw at the junction of the instrument's shaft and handle, contains the innovative spring system. Pressure applied to the handle advances a wire within the instrument shaft, pushing the top jaw down. As the jaws bite into meniscus, they meet resistance from the wire. When this pressure becomes too great, the spring mechanism allows the handle to close, but not the jaws. When the pressure decreases, function returns to normal.

SKLAR SOAK™
SURGICAL INSTRUMENT SOAK

Immersing soiled instruments in SKLAR SOAK™ for two minutes substantially reduces the risk of exposure to many infectious organisms.

- Effective Against: H1N1, HIV-1, HSV, VRE, Rotaviruses, Hep B & C as well as TB, MRSA, A. Baumannii.
- Non-Glutaraldehyde.
- PH Neutral Formula designed for safe use on all surgical instruments & stainless steelware.
- Non-Caustic Formula allows for use as a manual cleaner or in ultrasonic units.
- EPA Registered.
- Meets all OSHA standards on blood borne pathogen destruction.
- Ready to use.

OB/GYN INSTRUMENTS

Z-TYPE SCISSORS & FORCEPS

Sklar's Z-Type Hysterectomy/Parametrium Scissors and Forceps are specifically designed to ideally meet the surgeon's needs during vaginal and abdominal hysterectomy procedures. Manufactured from German grade stainless steel and under the highest quality standards, these specialized instruments provide uncompromised balance, feel and performance.

Z-TYPE SCISSORS

With solid Tungsten Carbide inserts, Z-Type Scissors have extremely sharp, strong and precise cutting edges with lasting durability, and are specifically formed to cut tissue laterally. They are designed to complement the curvature of Z-Type Forceps for optimal access, visibility and control.

PRODUCT NUMBER		DESCRIPTION
16–4000	9"	Z-Type Parametrium Scissors, Slight Curve
16–4001	9"	Z-Type Parametrium Scissors, Curved
16–4002	9"	Z-Type Parametrium Scissors, Full Curve

16-4013	14"	Z-Type Parametrium Scissors, Curved
16-4014	14"	Z-Type Parametrium Scissors, Full Curve

Z-TYPE FORCEPS

Longitudinal grooves with tip serrations on Z-Type Forceps ensure an atraumatic yet firm grip on tissue, minimizing slippage and tissue trauma. Longer instrument design and off-set handles ensure superior manipulation and exposure especially for deep pelvic surgery or obese patients.

OB/GYN INSTRUMENTS

SKLAR BLACK™ LASER

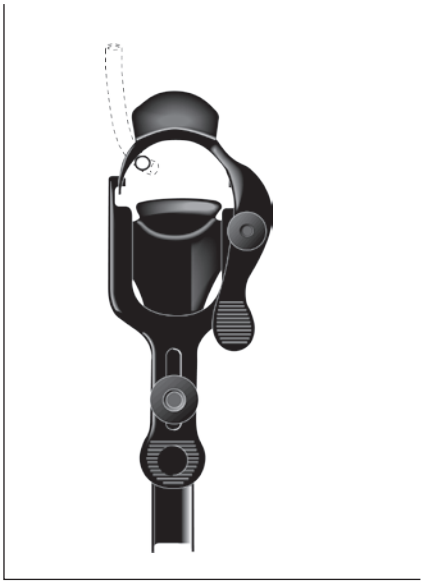

Sklar Black™ Laser Instrumentation

SANDBLASTED VS COATED INSTRUMENTS

Sklar understands the increased importance of patient/surgeon safety during laser procedures. So we utilize an improved black polymer coating on the Sklar Black™ Laser instruments. Applied on a sandblasted surface, Sklar Black™ Laser instruments effectively reduce reflective energy during laser procedures and improve safety. This durable application process delivers a reliable instrument you can use with confidence for years of service.

All Sklar laser coatings are guaranteed for one year against manufacturing defects.

LAPAROSCOPIC

SKLARTECH 5000 | SINGLE PORT

SINGLE PORT LAPAROSCOPY

Discover the New Evolution in minimally invasive Laparoscopic Surgery

Single Port Laparoscopic surgery is an innovative procedure in which the skilled surgeon operates almost exclusively through a single entry point, typically the patients navel. Unlike the traditional multi–port laparoscopic approach, SPL leaves only a single small scar and most patients report less discomfort and faster recovery.

- Decreased trauma and risk for herniation
- Enhanced cosmetic benefits with minimal visable scarring
- Reduced post–operative pain
- Accelerated recovery time

SKLARSPEC™

DISPOSABLE GRAVES VAGINAL SPECULUMS

SKLARSPEC plastic specula are clear, disposable, and comfortable. Plastic material allows 360 degree visibility and reduces thermal shock. Provides protection of the doctor, the nurse and the patient from cross contamination. Clean up is eliminated by single-use only. Plastic material avoids unpleasant temperature shock associated with metal. One hand operation with wide range adjustment.

MONSELS & LUGOLS

Sklar

SKLAR MONSEL'S FERRIC SUBSULFATE PASTE

A ONE-TIME USE pre-mixed paste packaged in convenient ready-to-use bottles. Also includes 12 rayon tip applicators.

Sklar has converted Monsel's solution (ferric subsulfate) into an efficacious and conveniently packaged paste. As a hemostatic agent it is ideal to apply to cervical tissue following colposcopic biopsy, electrosurgical excision (LLETZ or LEEP) and ablative (LASER) surgery. Sklar Monsel's is fabricated to relieve office personnel from the inexact and messy task of mixing their own compound for post-surgical treatment of their female patients.

PRODUCT NUMBER	DESCRIPTION	QUANTITIES
96-1200	8ml Bottle & Swab	12 Each

SKLAR LUGOL'S STRONG IODINE SOLUTION USP

A ONE-TIME USE pre-mixed iodine solution packaged in convenient ready-to-use bottles. Also includes 12 rayon tip applicators.

This iodine contrast medium is also sealed in airtight bottles which assist in mitigating waste associated with the use of this product. The Lugol's works quickly to assist the Colposcopist to identify potentially diseased cervical tissue (CIN) by changing suspect tissue in the cervical transformation zone into a white "target" for excision or biopsy. Healthy tissue will remain unchanged by the application of Lugol's.

DILATORS

SKLAR SILICONE VAGINAL DILATORS

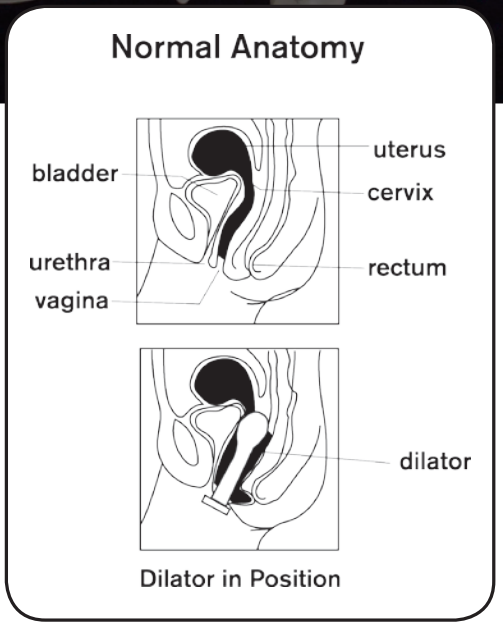

Sklar Silicone Vaginal Dilators are used to enlarge the vagina for the purposes of examination, a surgical procedure or for the relief of vaginismus. This is accomplished by supporting or distending the vaginal canal. They are contraindicated in acute genital tract or pelvic infections or with non-compliant patients.

CERVIX BRUSHES

Sklar

SKLAR CERVIX BRUSH
CERVICAL CELL SAMPLER

Sklar's Cervix Brush is made of polyethylene and has a total length of 20 centimeters. The top portion uses a soft flexible brush to obtain cell samples. The brush consists of 57 semi-circular plastic bristles of various lengths. The shape is such that the top edges of the brush follow the contours of the cervix. The longer middle bristles reach deep into the endocervical canal. The shorter bristles touch both the ectocervical area and transformation zone a the same time.

RUUD CLINIC LIGATOR SET

80–1914 Set Includes: Ligator, Forceps, 100 "O" Rings and Speculum

The Ruud Clinic Hemorrhoidal Ligator is an improved instrument for elastic band ("O" Ring) ligation of hemorrhoids. It is simply designed with only one moving part for greater dependability and trouble–free performance. Separate loading cone facilitates loading "O" ring bands on cylinder. Instead of suddenly releasing the band around entire hemorrhoid, the Rudd Ligator releases the band from one side of the applicator for a more gradual encirclement of the hemorrhoid.
This instrument also features a shorter and wider cylinder to allow for use on larger hemorrhoids and mucosal prolapse. It provides better visibility before, during and after ligation, to assure proper placement of bands.

McGIVNEY HEMORRHOIDAL LIGATOR SET

80–1945 Set Includes: Ligator, Forceps, 100 "O" Rings and Speculum

The McGivney Hemorrhoidal Ligator Set provides the convenience of a plier handle elastic band applicator.

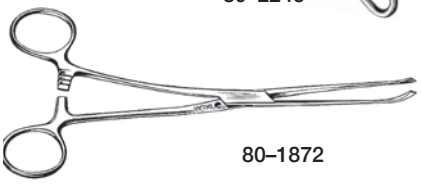

- It is supplied with a separate loading cone.
- A specially designed double bend forceps that provides better visualization.
- The Ives (Fansler) Rectal Speculum is the instrument of choice for Ligation procedures.

Included are 100 Elastic "O" Rings that can be reordered as 80-1912.

SKLAR SOAK™

SURGICAL INSTRUMENT SOAK

Immersing soiled instruments in SKLAR SOAK™ for two minutes substantially reduces the risk of exposure to many infectious organisms.

- Effective Against: H1N1, HIV-1, HSV, VRE, Rotaviruses, Hep B & C as well as TB, MRSA, A. Baumannii.
- Non-Glutaraldehyde.
- PH Neutral Formula designed for safe use on all surgical instruments & stainless steelware.
- Non-Caustic Formula allows for use as a manual cleaner or in ultrasonic units.
- EPA Registered.
- Meets all OSHA standards on blood borne pathogen destruction.
- Ready to use.

DIAGNOSTIC INSTRUMENTS

STETHOSCOPES

Sklar

Designed to meet the exacting standards of health care professionals who demand precise acoustic response in various settings, Sklar offers a full range of Stethoscopes that feature superb craftsmanship and performance.

SPRAGUE RAPPAPORT STETHOSCOPES

- The most popular stethoscope style on the market, worldwide.
- Includes five easily interchangeable chest pieces: 3 Bells (Large, Medium and Small) and 2 Diaphragms (Small and Large) allowing for a full range of diagnostic capabilities. Also includes 3 different size ear tips.
- Superior high and low frequency sensitivity; designed to detect the entire range of heart and chest sounds. Clinically proven to deliver more faint heart sounds and murmurs than other stethoscopes.
- Chest piece is equipped with a full rotational dual-output acoustic valve mechanism that ensures smooth rotation and accurate acoustic transmission.
- All components are individually machined and precisely assembled to deliver the choice stethoscope of medical professionals.
- Comfortably angled, anatomically correct headset with patented soft ear tips and excellent acoustic seal.
- Latex Free.

DIAGNOSTIC INSTRUMENTS

STETHOSCOPES

PEDIATRIC AND INFANT STETHOSCOPES

- Traditional bell/diaphragm chest pieces are specifically designed, sized and acoustically precise for pediatric and infant applications.
- Features Solid Stainless Steel, dual-sided chest piece with traditional 1" Bell and smaller ¾" Bell.
- Easy rotation between diaphragm or open bell side of stethoscope and sensitive to both high and low frequencies.
- Available in a variety of attractive colors.
- Excellent acoustic seal and comfortable fit with patented soft ear tips and a comfortably angled, anatomically correct headset.
- Latex Free.

STERILIZATION CONTAINERS

SKLARLITE™

STERILIZATION CONTAINER SYSTEM

Pre-Vacuum Steam Sterilization

The SklarLite Rigid Sterilization Container System provides an organized, routine and secure approach to the sterilization of surgical instruments. Customize your SklarLite™ System by selecting colored lids and ID labels. Available in your choice of six vibrant colors for easy identification of instrument sets by procedure and/or department. Choose from various configurations to fit your surgery center needs.

- **Anodized aluminum alloy is strong and durable yet lightweight and easy to handle.**
- **Stackable Containers maximizes space in the autoclave and storage shelf space; reduces cycle runs.**
- **Stackable Baskets provide ease of instrument transfer per procedure and maximizes space inside containers.**
- **Silicon mats secure delicate and laparoscopic instruments to minimize damage.**
- **Tamper evident seals prevent accidental sterile field breach.**
- **Long Lasting Sterilization.**

STANDARD CONTAINERS

Consists of a body and perforated lid and used with Sklar's disposable filters and other compatible accessories for sterilization. Choose from either perforated or non-perforated bottoms. Lids available in six different colors for easy identification by procedure or department.

SAFE CONTAINERS

Consists of identical body and perforated lid, but features an additional solid cover that safeguards the perforation field and contents during transportation and storage. Choose from either perforated or non-perforated bottoms. Safety lids available in six different colors for easy identification by procedure or department.

INSTRUMENT CASSETTES

INSTRUMENT CASSETTES

Organized Procedure Kits save time and improve safety! Sklar is pleased to introduce a new line of cassette trays to organize and protect instruments during handling and transportation. Removable, silicone instrument holders afford you the option of an open configuration in any cassette. Cassettes with detatchable lids feature moveable instrument holders to customize instrument configuration. Choose from various cassette sizes and styles to fit your needs.

- High quality, heavy gauge stainless steel.
- Optimum slot position for effective cleaning and drainage.
- Easy open/closing latch system.
- Silicone Inserts for secure instrument placement.

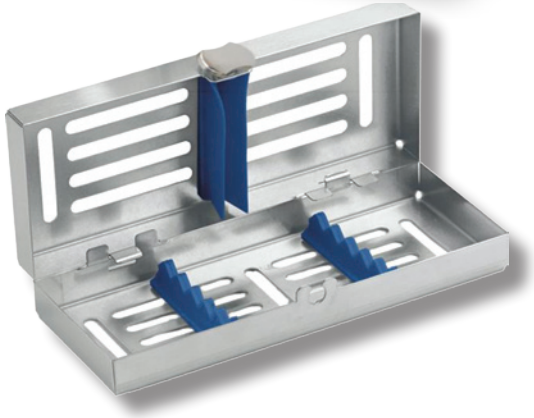

SMALL CASSETTES

Typical Applications Include:

- Diagnostic Kit
- Root Planning Kit
- New Patient Kit
- Composite Kit

PRODUCT NUMBER	SIZE	CONFIGURATION	FEATURES
10-6500	7" x 2¾" x 1⅓"	5 Instruments	Detachable Lid/Instrument Holders
10-6501	7" x 2⅓" x 6/7"	5 Instruments	Fixed Lid/Instrument Holders

MEDIUM CASSETTES

Typical Applications Include:

- Hygiene Kit
- Restoration Kit
- Cavity Prep Kit
- Endo Kit
- Crown & Bridge Kit

PRODUCT NUMBER	SIZE	CONFIGURATION	FEATURES
10-6505	7" x 4⅓" x 1⅓"	7 Instruments	Detachable Lid/Instrument Holders

GRADUATING TUBULAR SCALES AND GAUGES

The standard French,or Charriere, scale **(abbreviated Fr.)** is generally used in the size callibration of catheters and other tubular instruments. It is based on the metric system, with each unit being approximately **(0.33mm)** in diameter between consective sizes.

FR.	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	FR.

SERVICE

It all starts with our dedicated team of knowledgeable account managers who offer consultation on all aspects of surgical instruments and related supplies. We maintain a full warehouse of products ready for same day shipment.

Sklar offers a complete line of care and cleaning products to protect your investment –including lubricants, disinfectants, detergents, enzymatics, brushes and trays. Safety data sheets and troubleshooting guides are available on our website and through our sales team.
Repair and replacement service via our lifetime guarantee is an integral part of our customer-forward value. Our experienced and skilled craftsmen have been making surgical instrument repairs for decades.

Additionally, Sklar offers accredited Continuing Education for the medical professional.
In addition to our domestic presence, we have developed relationships with clientele around the globe.

SKLAR SPRAY-ZYME™

SURGICAL INSTRUMENT PRE-CLEANER

Multi-Enzyme Based Instrument Presoak & Foam Spray Cleaner

The newest product from Sklar for expert care of your surgical instruments. This multi-enzymatic spray creates a heavy foam which lasts for hours, keeping soiled instruments moist to avoid encrustation while also pre-cleaning prior to processing.

- Prevents Organic Encrustation - enzyme foam stops blood and bodily fluids from drying onto surgical instruments.
- No More Spills - messy spills between the operating room and central cleaning / processing department are eliminated.
- Neutral pH - safe and effective for stainless steel, tungsten carbide, aluminum and brass instruments.
- Bacteriostatic - microbiological control agents inhibit bacterial growth in the ready-to-use foam solution.
- Long Lasting Foam - saves time, foam lasts many hours after application.
- Multi-Enzymatic - contains a synergistic blend of lipase and protease enzymes.

PRODUCT NUMBER	FEATURES	QUANTITIES
10–2722	22 oz. Refillable Spray Bottles	12/case
10–2724	1 Gallon Bottles	4/case
